# TERMINATION INSTRUCTIONS

Keystone Jacks 180 Degree Punchdown with KJ Termination Tool

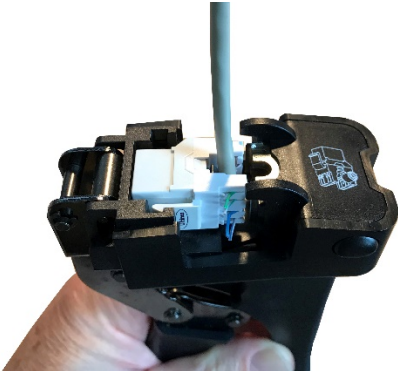

781934 (Cat5e White)
781935 (Cat6 White)
792381 (Cat6 Black)

1. Remove approximately 50mm of the cable sheath and separate the 4 pairs. For Cat 6 cables carefully cut back the central plastic separator flush with the cable sheath.

2. Present the cable at 90º to the rear of the jack and dress the wires in to the appropriate coloured IDC slots following the preferred wiring configuration.

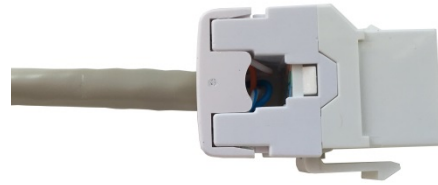

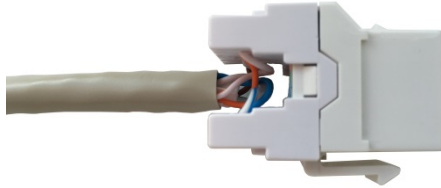

3. Load the keystone jack in to the KJ termination tool.

4. Fully squeeze together the handles of the KJ termination tool so that the excess wire is trimmed.

25 YEAR WARRANTY

Keystone Jacks 180 Degree Punchdown with KJ Termination Tool

5. Remove the jack from the KJ termination tool. Rotate the cable through 90º so that it is perpendicular to the jack.

6. Fit the wire retention cap.

Recommended Tools

Part Number	Description	Purpose
994080	Side Cutters - 160mm	Cutting cable to length
823605	Cyclops Stripper	Cutting sheath
809585	Mini Flush Cutters	Trimming cable tie
826163	KJ Termination Tool	Terminating and trimming wires
